

Passkey Connect

Embrace the Future of Authentication

Passwordless Login with Biometrics

Enhance your customers' login experience with frictionless and highly secure passwordless authentication.

Easy to enable. This awesome new feature can be added even if Cloud ID is not your current identity provider!

Passkey Connect Overview

- Allows for frictionless biometric login through fingerprint or facial recognition
- Can be set up to use a PIN, the same way you unlock your phone
- Utilizes passkeys, recently adopted by Google, Apple and Microsoft
- Easy API Integration – can be layered on as a stand-alone service

Benefits of Cloud ID Passkey Connect

Works for all logins

- Use for Bill Pay, My Account, TV Streaming, etc.
- Drop support costs with easier logins

Improved security

- Protect against breaches and phishing attacks
- Prevent password sharing
- Passwordless is multi-factor authentication by default (Device + Biometrics/PIN)

Privacy by design

- Biometric data is stored on device, private key does not leave device

Ease of integration and adoption

- Widely supported across leading platforms and browsers
- Application support is enabled with simple API calls

Passwordless Login for Connected TV Devices

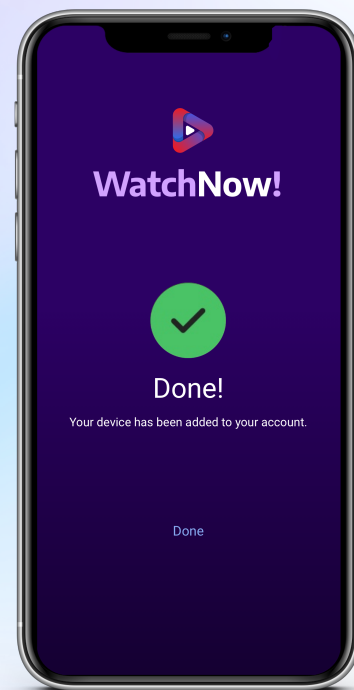

No more clumsy password entries with the remote

Scan the code on TV.

Log in with fingerprint.

All done. Grab the popcorn!

Get Passkey Connect and much more from Cloud ID

- Multi-Factor Authentication and one-time passcodes
- QR codes for connected devices, allowing users to skip PIN entry for device pairing
- Home-Based Authentication
- Integrations to partners like Amazon, Paramount+, Peacock, MAX and hundreds of content and service providers

Trusted by the biggest players in the industry
